

STEPS TO TAKE EVERYDAY ON YOUR ACCOUNT

1 Check notifications:

This is where I start my account daily and I always show appreciation to the followers who retweeted, replies and just followed. All my followers are special.

2 New followers:

Not all new followers fit into your real estate mode. Learn to monitor your account.

3. Engage with new followers:

Video 2 covers the retweets, replies & quotes

4. Follow new real estate minded accounts everyday:

I will show you how to get 30 new qualified followers a day or more. Your account should be moving like Warren Buffet's net worth.

5. Send out about your listings but you will need more to engage:

"I would love to show you my listing" goes nowhere. You have got to engage your followers or I call it tweeting alone. Is anyone out there?

6. Search for your area followers:

Very important to connect with twitter users in your area to sell homes. This is why you are really on twitter. I cover this in video 4 and building your lists.

7. Clean up your account:

My system will keep your account moving forward. Prevents your account from going stagnant.

It took me years to learn twitter so take the course and start building!
